

Reading Model Climate Conference

What did you enjoy most about the conference?

'I enjoyed that each country was allowed to speak freely and say what they think is right.'

'The experience of acting like politicians to know how difficult it is to make a decision in the UN where everyone is satisfied'

'Being challenged by other countries and finding counter arguments.'

Was the model UN process what you expected?

'It was organised and I could feel the pressure around the room.'

'No, I didn't believe it would be as good education and knowledge growth'

'No it was a lot more realistic!'

'It was so much better and I enjoyed it very much.'

What has the conference made you think about more?

'It is not always easy to just say 'I will reduce carbon emissions'. It is necessary to consider other things as well.'

'I have new thoughts about the impact of larger and more industrialised countries have on the rest of the world and the responsibility we must take to help countries like the Maldives and Cuba who will be effected first.'

'That global warming isn't just about switching a light bulb off!'

'Actually getting more involved in politics'.

'What the countries are doing behind the scenes about reducing their carbon emissions.'

'It has made more think about how much CO2 countries are using.'

'How much each countries opinions mean and how different friendships between countries are formed.'

'I have thoroughly enjoyed the day and believe it's so important for young people to be given the opportunity to take part! I'd love to do it again. Thank you!'
